

Amplifon Overview

February 2026

PREPARED FOR

University of Pittsburgh

What Causes Hearing Loss?

Hearing loss can be caused by many different factors: Noise exposure being preventable

HEALTH

- Certain infections such as bacterial meningitis and mumps
- Genetics
- Family health history

NOISE

- Exposure to an extremely loud noise such as an explosion
- Continuous exposure to loud environment or work sounds such as traffic, heavy equipment, drills, sirens, etc.
- Repeatedly listening to earbuds or headphones at high volumes

AGE

- Deteriorating inner ear function – tiny hairlike cells die with age and do not regrow
- Chronic medical conditions such as diabetes and heart disease
